Wetland/Stream Consultant Roster

For project sites with wetlands, streams, and/or their associated buffer areas, a wetland and/or stream study is required, prepared by a qualified professional. Per RMC 4-3-050F7, when appropriate due to the type of critical areas, habitat, species present, or project area conditions, the Reviewing Official may require the applicant to fund analyses including evaluation by an independent qualified professional regarding the applicant's submitted analysis and the effectiveness of any proposed mitigating measures or programs, to include any recommendations as appropriate. This shall be paid at the applicant's expense, and the Reviewing Official shall select the secondary review professional. The following is a list compiled by the City of Renton in alphabetical order of Wetland/Stream Consultants that are pre-qualified to prepare the initial critical areas studies and conduct a secondary review of wetland/stream studies, supplemental stream studies and mitigation plans for the City.
